SUMMARY

With a strong passion for software development, I have gained extensive experience spanning PHP-based projects to technologies like Node.js, Vue.js, and React. I specialize in creating user-focused, scalable, and innovative solutions. My active roles in team leadership and project management enable me to effectively apply my technical expertise to deliver value to stakeholders. I aim to continue learning and contributing within a dynamic and collaborative team environment.

EXPERIENCE

PHP Developer

Pfizer May 2023 - Present, Remote

Pfizer is a biopharmaceutical company that provides affordable access to safe, effective medicines and health care services.

- I contribute to the projects within Pfizer by working periodically.

Lead Developer

Niceye Group February 2023 - Present, Remote

- Actively managed work allocation and led project planning efforts with the team.
- Played a key role in tasks such as defining requirements, managing projects, and troubleshooting issues in new project development.

Software Developer

Niceye Group September 2021 - February 2023, Remote

- Actively contributed to ongoing projects and played a key role in new project initiatives.
- Prepared solutions for existing issues and implemented preventive measures for potential challenges.

PHP Developer

Otto Solmaz June 2017 - August 2021, Canakkale, Turkey

- Managed in-house software systems and online marketplaces.
- Created and integrated the company's ERP system with marketplace platforms.
- Contributed to website management and the development of new applications within the company.

PROJECTS

Sarı Kırmızım

Personal Project • sarikirmizim.com • April 2023 - Present

- Sarikirmizim.com, a website dedicated to Galatasaray, the team I passionately support.
- Through this project, I tested my skills with new challenges and aimed to create a platform specifically for fans.
- I utilized Vue.js extensively in developing this platform, enhancing its functionality and user experience.
